| Weight | 300 Pounds |

Easily blast a variety of parts with our 5532. Spacious interor and powerful 25 CFM blast system. Clean parts, etch glass, and so much more.

Cyclone abrasive blasting cabinets are constructed from high quality components, then sealed and painted to prevent leaks and protect the exterior finish.

Welded steel makes for a sturdy cabinet capable of handling heavy items. A foot pedal activated blast gun with a tungsten carbide nozzle produces a powerful blasting stream. This makes quick work of any project.

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.

With budgets in mind, we produce quality that won't hit your bottom line.
