# CYCLONE MANUFACTURING

## *Subject: Notice of Price Adjustment: Equipment and Parts*

Dear Valued Partner,

Throughout this year, Cyclone Manufacturing has experienced steady price increases from our vendors. These changes are driven by rising fuel and raw material costs, which have impacted the Consumer Price Index (CPI) across our entire industry.

To maintain the high quality and reliability of our products, we are updating our pricing on equipment and parts to reflect the moving average of these market increases.

**Effective immediately, new pricing will apply to all upcoming orders.**

We appreciate your understanding and continued partnership as we navigate these industry-wide economic shifts. If you have any questions regarding pending quotes or upcoming orders, please reach out to your account representative.

Sincerely,

**The Cyclone Manufacturing Team**
