| Weight             | 225 US Pounds               |

The DC4000 produces a powerful 400 CFM. A tremendous amount of airflow for the most demanding environments. Powered by a 1/3 horsepower direct drive motor, this unit is both powerful and solid.

Constructed of 16 gauge welded steel, this unit stands up to the toughest environments. A large cartridge filter protects the motor from dust and debris without sacrificing airflow.

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.

*With budgets in mind, we produce quality that won't hit your bottom line.*
