Weight	350 US Pounds

The DWS 6035 is a dual workstation. It **includes a powerful 90 CFM dust collector** to improve visibility inside the cabinet. Also included are tungsten carbide nozzles.

Cyclone abrasive blasting cabinets are constructed from high quality components, then sealed and painting to prevent leaks and protect and shine.

Welded steel makes for a sturdy cabinet capable of handling heavy items. A trigger activated blast gun with a ceramic nozzle produces a powerful 14 CFM. This makes quick work of almost any project.

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.

With budgets in mind, we produce quality that won't hit your bottom line.
