The FT 3522 cabinet handles small to medium sized parts. It's a perfect sized unit for DIY, home owners, and where a powerful blaster with a small footprint is needed.

Cyclone abrasive blasting cabinets are constructed from high quality components, then sealed and painted to prevent leaks and protect the finish. The interior of the view window includes a protective layer to prolong its life.

Welded steel makes for a sturdy cabinet capable of handling heavy items. A trigger activated blast gun with a ceramic nozzle produces a powerful 14 CFM. This makes quick work of almost any project.

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.

*With budgets in mind, we produce quality that won't hit your bottom line.*
