| Weight                     | 250 US Pounds               |

The DT-350 is a downdraft table perfect for woodworking, metal or any project that produce dust and debris. The motor pulls a huge 350 CFM through the steel perforated work table. A large cartridge filter protects the motor and an quick-clean trap makes emptying the hopper easy.

Welded steel makes for a sturdy unit capable of handling heavy items. The DT-350 also includes an switched internal light fixture that gives exceptional visibility during use. The large hinged window opens and so does the entire lid making small or large parts easy to work on.

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.

*With budgets in mind, we produce quality that won't hit your bottom line.*
