The PT100 SK is what we call our "Side Kick". This powerful pressure blast pot includes the necessary components to connect to an existing blasting cabinet.

We bring pressure blasting power to your existing cabinet. This saves on the expense of a new direct pressure system. Pressure blasting can be more efficient than siphon systems and can also be more expensive.

We make connecting this unit easy and include the parts you need to get to work fast.

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.

*With budgets in mind, we produce quality that won't hit your bottom line.*
