The E100 is an amazing benchtop blasting cabinet. Constructed from tough, thick polyethylene, you get big power in a small footprint that comes assembled and won't leak.

This unit is ideal for DIY users, the home garage, and commercial applications as well. Ideally sized to fit on the table top but keeps the power of its bigger cabinet family.

Thick, spun polyethylene construction means no seams and no leaks. Abrasive media stays inside the cabinet. Properly sloped hopper also keeps abrasive flowing.

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.

With budgets in mind, we produce quality that won't hit your bottom line.
